

Product Information

THERMO-AS

Description

This product is a specifically formulated liquid heavy duty extraction detergent for the new "5th Generation" nylon anti-stain carpeting. When diluted, this product has the correct and ideal pH that is recommended for the cleaning of these stain resistant carpets.

This product contains no cationic additives which will neutralize the stain resistant properties of the carpet. When used as directed it will safely clean any of these new stain resistant fibers. Since it is a liquid, it is instantly dilutable in water. It can also be successfully used on all other carpeting.

Recommended Uses

Recommended for use in all portable or truck mounted jet extraction equipment as an extraction shampoo for anti-stain and all other carpeting.

Directions

NOTE: Test a small area of the carpet to be cleaned with a towel dampened with shampoo to make sure the color is fast.

1. Pre-vacuum the carpet thoroughly to remove all loose soil.
2. Use a traffic lane pre-spray for soiled areas. Make sure this product has been formulated for anti-stain carpeting.
3. For portable jet extraction machines, make a ready to use solution by diluting approximately 1 ounce of this product per gallon of warm water. For truck mounts, make a concentrated stock solution by using 12 to 16 ounces of this product per gallon of warm water. (Always check recommended dilution and use rate by the truck mount manufacturer.)

ATTENTION: Never put "additives" into the cleaning solution as this may severely affect the carpet's stain resistant characteristics.

WARNING: SKIN AND EYE IRRITANT. Contains Alkaline Builders, Glycol Ether Solvents and Surfactants. Do not get in eyes, on skin or clothing. Harmful if swallowed. Do not take internally.

FIRST AID: For eyes, flush immediately with plenty of water for at least 15 minutes and get medical attention. For skin, wash thoroughly with water. If irritation persists, see a doctor. If swallowed, drink large quantities of water or milk. Get medical attention immediately
