## WATER BASED SILICONE SEALER

### Description

Tile Star Water Based Silicone Sealer is a silicone resin designed to protect the surface of new or old wall and floor grout. It protects and helps prevent liquid absorption, which may cause grout failure and staining.

New installations can be sealed after 48 hours. Compatible with all grout colors. (This product may enhance the color of the grout. If this is undesirable, apply a small amount in an inconspicuous area and allow to dry 48 hours as a test.)

Approximate coverage:   Sanded grout - 180 sq. ft. per quart  
                                  Unsanded grout - 250 sq. ft. per quart

### Directions

Use full strength. Apply to the grout lines with a brush, cloth or low pressure sprayer. For glazed or unglazed tiles, remove excess, before it dries, with a soft dry cloth and wipe to a shine, being careful not to disturb the grout lines.

If excess sealer is allowed to dry on the surface of the tile a whitening or film will form. This can be difficult to remove, but using a sponge or cloth moistened with water, scrub the tiles as soon as possible.

- **Do not use on unsealed marble or agglomerate tiles.**
- **Avoid contact with glass. If this product is allowed to dry on glass a residue may be created which is not removable. If accidentally splashed on glass, flush immediately with water.**

**CAUTION:** Eye Irritant. Avoid getting product in eyes. Harmful if swallowed. Do not take internally. Avoid prolonged or repeated contact with skin.

**FIRST AID:** If in eyes, flush immediately with water for at least 15 minutes, then see a doctor. For skin, wash with soap and water. If irritation persists, see a doctor. If swallowed, do not induce vomiting. Call a physician immediately.

KEEP OUT OF REACH OF CHILDREN

### Specifications

Appearance .....	Clear, colorless liquid
Weight per gallon .....	8.45 lbs.
pH .....	12.6
Percent solids .....	3.0
